Appendix I. Prevalence and incidence renal replacement therapy in age categories
Appendix II. Prevalence and incidence of dialysis and transplantation in age categories
Appendix III. Prevalence and incidence of dialysis and transplantation in primary kidney disease categories
Appendix IV. Home dialysis in age categories
Appendix V. Home dialysis in primary kidney disease categories
APPENDIX I. PREVALENCE AND INCIDENCE RENAL REPLACEMENT THERAPY IN AGE CATEGORIES

Prevalence and incidence of renal replacement therapy in age categories. To improve readability of the graph the scale of the youngest age category was adjusted to 10% of the scale in the other categories.
APPENDIX II. PREVALENCE AND INCIDENCE OF DIALYSIS AND TRANSPLANTATION IN AGE CATEGORIES

Prevalence and incidence of dialysis and renal transplants in age categories expressed per million age related population. Incidence includes all patients starting dialysis or receiving a renal transplant irrespective of previous renal replacement therapy. To improve readability of the graph the scale of the youngest age category was adjusted to 10% of the scale in the other categories.
APPENDIX III. PREVALENCE AND INCIDENCE OF DIALYSIS AND TRANSPLANTATION IN PRIMARY KIDNEY DISEASE CATEGORIES

Glomerulonephritis/sclerosis

Pyelonephritis

Polycystic kidneys, adult type

Hypertension

Renal vascular disease

Diabetes type 1
Prevalence and incidence of dialysis and renal transplants in primary kidney disease categories. Incidence includes all patients starting dialysis or receiving a renal transplant irrespective of previous renal replacement therapy.
Prevalence of peritoneal dialysis and home haemodialysis in age categories on December 31th. Prevalence is expressed as percentage of total dialysis.
APPENDIX V. HOME DIALYSIS IN PRIMARY KIDNEY DISEASE CATEGORIES

- Glomerulonephritis/sclerosis
- Pyelonephritis
- Polycystic kidneys, adult type
- Hypertension
- Renal vascular disease
- Diabetes type 1
Prevalence of peritoneal dialysis and home haemodialysis in categories of primary kidney disease. December 31th. Prevalence is expressed as percentage of total dialysis.
